

University of Michigan: Going digital to focus on strategic initiatives

The University of Michigan is a public research university in Ann Arbor, Michigan that was founded in 1817. The university's IT department integrated signNow's private cloud with SSO functionality and provided e-signature workflows for employees across the board.

Key challenges before using signNow:

- ✗ Completing a single document workflow took up to several weeks
- ✗ Receiving documents with missing or inaccurate data
- ✗ Storing paper documents took up additional space
- ✗ Spending time on tedious, repetitive paperwork took up much of employees' days

Results achieved with signNow:

Employees reduced document turnaround times from weeks to days

Employees received complete, accurate digital documents on time

Employees completely eliminated paper processes and stored all documents on secure university servers

Employees committed more time towards strategic initiatives rather than paperwork

A few features University of Michigan signNow users love:

- The ability to prepare and send documents in just a few clicks
- Password protected documents to authenticate signers
- Collect and access an audit trail history automatically
